Dominiqu Nigatu

Student | Results-focused

PROFILE

Third-year Information and Knowledge Systems student at the University of Pretoria, specializing in software development. Passionate about building practical software solutions and eager to apply and expand my skills in a professional environment.

TECHNICALS

Software development experience

University of Pretoria, Pretoria | Jan 2024 - present

- Developed full-stack web and mobile applications through university and personal projects using modern software engineering practices.
- Designed and implemented scalable front-end, back-end, and database solutions, including REST APIs, authentication, and relational databases. Collaborated using Agile methodologies, Git, GitHub, and code reviews to deliver maintainable software.

Technical skills

University of Pretoria, Pretoria | Jan 2024 - Jan 2025

- Programming Languages
  - JavaScript, TypeScript, C#, PHP, C++, Delphi
- Frontend Development
  - HTML, CSS, Angular, Vue.js, Ionic
- Backend Development
  - .NET Framework, REST API Development, Server-side programming with PHP and C#
- Tools & Technologies
  - Git, GitHub, Docker
  - Microsoft Office Suite (Word, Excel, PowerPoint, Access)

PROJECT EXPERIENCE

Capstone Software Engineering Project (University of Pretoria)

Industry Mentor: Agile Bridge

Team Project | University of Pretoria

- Developing a production-grade software application using .NET, React, and Next.js in collaboration with an industry mentor.
- Applying Clean Architecture, SOLID principles, and dependency injection to build a scalable and maintainable system.
- Developing reusable UI components using Atomic Design principles to improve consistency and maintainability.
- Collaborating in an Agile team through sprint planning, client meetings, code reviews, and version control with Git.

Technology Price Comparison Platform

Group Project | University of Pretoria

- Developed a full-stack web application that compares technology products using real-time pricing data.
- Designed and implemented a relational SQL database with optimized queries for efficient data retrieval.
- Built a responsive front-end using HTML, CSS, and JavaScript, focusing on usability and performance.
- Integrated external APIs and implemented secure coding practices, including input validation, password hashing, and SQL injection prevention.
- Collaborated using Git and GitHub for version control and team-based software development.

FilmLog – Movie Tracking Web Application

Project | University of Pretoria

- Developed a full-stack web application that enables users to track movies, manage watchlists, and view personalized viewing statistics.
- Built a RESTful API using ASP.NET Core with Entity Framework Core and SQL Server, following relational database design principles.
- Developed a responsive front-end using Angular and Ionic Framework, creating a mobile-first user experience with real-time data visualization.
- Integrated the OMDb API to provide live movie information with search and filtering functionality.
- Implemented secure authentication using JWT, BCrypt password hashing, input validation, and environment variable configuration.
- Used Git, GitHub, and Docker for version control and database containerization.

EDUCATION

Bachelor of Information and Knowledge Systems

University of Pretoria, Pretoria | Jan 2024 - Jan 2024

Specialization: Software Development

National Senior Certificate

Star College Pretoria, Pretoria | Jan 2019 - Dec 2023

Relevant Subjects: Mathematics, Physical Sciences, Information Technology(IT), Computer Applications Technology(CAT), English, Afrikaans
