ABOUT ME

Final-year Information and Knowledge Systems student at the University of Pretoria, specializing in software development. Passionate about building practical software solutions and eager to apply and expand my skills in a professional environment.

Experienced in full-stack web and mobile development, including REST APIs, authentication and relational databases, and in collaborating within Agile teams using Git, GitHub and code reviews.

TECHNICAL SKILLS

Programming: JavaScript; TypeScript; C#; PHP; C++; Delphi

Web Development: HTML; CSS; Angular; Vue.js; Ionic; React; Next.js

Backend Development: .NET Framework; ASP.NET Core; Entity Framework Core; REST API development; server-side programming with PHP and C#

Databases: SQL; SQL Server; relational database design; query optimization

Tools & Technologies: Git; GitHub; Docker; Microsoft Office Suite (Word, Excel, PowerPoint, Access)

Technical Knowledge: Clean Architecture; SOLID principles; dependency injection; Atomic Design; Agile methodologies; JWT authentication; secure coding practices

PROJECTS

Capstone Software Engineering Project – University of Pretoria (Completed)

- Developed a production-grade application using .NET, React and Next.js in collaboration with industry mentor Agile Bridge.
- Applied Clean Architecture, SOLID principles and dependency injection, with reusable UI components built using Atomic Design.
- Worked in an Agile team through sprint planning, client meetings, code reviews and Git.

Technology Price Comparison Platform – Group Project

- Developed a full-stack web application that compares technology products using real-time pricing data.
- Designed a relational SQL database with optimized queries and integrated external APIs.
- Applied secure coding practices, including input validation, password hashing and SQL injection prevention.

FilmLog – Movie Tracking Web Application

- Developed a full-stack app for tracking movies, managing watchlists and viewing personalized statistics.
- Built a RESTful API using ASP.NET Core, Entity Framework Core and SQL Server, with an Angular and Ionic mobile-first front-end.
- Integrated the OMDb API and implemented secure authentication using JWT and BCrypt; used Git, GitHub and Docker.

EDUCATION

Bachelor of Information and Knowledge Systems (In Progress) — University of Pretoria

Final-year student | 2024 – Present | Specialization: Software Development

Coursework: Algorithms; Programming Languages; Database Systems; Human-Computer Interaction; Interaction Design; Software Engineering.

National Senior Certificate (NSC) — Star College Pretoria | 2019 – 2023

Subjects: Mathematics; Physical Sciences; Information Technology; Computer Applications Technology; English; Afrikaans.

VOLUNTEER EXPERIENCE

KTG Volunteer – Computer Literacy Program | February 2025 – October 2025

- Created videos and presentations on computer literacy skills for KTG to reuse in the communities they visit next.

- Taught computer literacy to students from underprivileged backgrounds, breaking concepts into clear, beginner-friendly material.
- Communicated with staff members to stay informed about volunteer opportunities and events.

SPCA Volunteer | January 2023 – September 2023

- Provided emotional support to animals through regular interaction, playtime and companionship.
- Participated in the care of homeless and abandoned pets at the shelter.
- Built patience, empathy and reliability through consistent hands-on commitment.

ACCOMPLISHMENTS

HUNT.ZA Hackathon 2026 | 3rd place overall

- Finished 3rd place overall as part of a team of 3.

Eskom Expo for Young Scientists | Bronze Award, Provincial Finals

- Achieved over 80% at the interschool science fair, qualifying for the provincial finals.
- Awarded a bronze medal at the provincial finals held at the University of Johannesburg.
